

Engine House Services Newsletter for November 20th, 2009

It was great to talk to a lot of you last weekend at TrainFest; however, we apologize if we did not get a chance to talk to you, due to the amount of people at our booth. Now that TrainFest is behind us we can catch our breath and get ready for Thanksgiving, which I cannot believe it is this coming week! For those of you that are out in the woods hunting, we pray for your safety. Nevertheless, Thanksgiving is a time to reflect on what we have and to give thanks for it. EHS has been blessed with a great staff and great customers, which I am eternally grateful for.

We brought home some goodies from the show for those of you that did not attend, which include some laser cut tall structures and professional airbrushes from Iwata. We also received some new Atlas N Scale rolling stock this week along with the new Mini Metals 1950's Dodges in both HO and N Scale. The latest word we received from InterMountain was that the Cab Forward locos with sound have been shipped and should arrive the first part of next week and the MTH SD70 Heritage locos should be arriving in about a week (we'll see).

We will be closed this Thursday for Thanksgiving, and reopen on Friday per usual.

Our clinics continue on Saturday afternoons at 1:30 and Tuesdays at 6:30.

Tomorrow's clinic is on decoder installation. If you have a loco that needs a decoder installed bring it to class and we will coach your install. Tuesday's clinic with Glenn Guerra will be on finishing the wood cabooses that were worked on this past Tuesday; however Glenn will also show you soldering techniques for etched brass parts.

Saturday November 21 DCC Decoder Installation

Tuesday November 24; Adding Details to a Laser Cut Wood Caboose with Glenn Guerra

Saturday November 28, Soldering Tips and Basic Electronics

Tuesday December 3, Kitbashing Locomotives

MSRP \$19.99, EHS Preorder \$14.00

As stated above I have a lot to be thankful for, especially you our customers because without you we would not be here. Also, I have to thank your staff, Don, Dick, Mark, and Dennis for all of their hard work. And last but not least, I need to thank our unofficial staff; Russ, Bill, Dan, Pat, John and Dan for their input and appreciated assistance.
